

# DEMAND EXCALIBUR™ SOLID ALUMINUM THRESHOLD

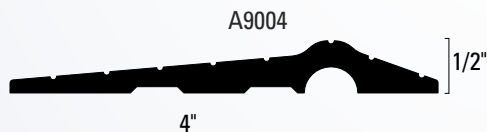

**For industrial overhead and entry door applications - where maximum strength and durability are required.**

This unique design stands 1/2" tall and is built with 6061-T6 solid aluminum to withstand extreme weight and excessive traffic conditions.

Two-way fastening/seal system won't shift, buckle or leak, while top V-groove design provides for skid proof protection and improved tire traction on loading docks and incline ramps.

The 1/2" diameter wire access port makes it easy for sensor and security installations. The kit comes complete with pre-drilled counter sink holes, 3/8" anchors and sealant.

PART NUMBER	SIZE
<b>4" WIDTH</b>	
A9004-08-X	8' 2" length
A9004-10-X	10' 2" length
A9004-12-X	12' 4" length
A9004-16-X	16' 4" length
<b>6" WIDTH</b>	
A9006-08-X	8' 2" length
A9006-10-X	10' 2" length
A9006-12-X	12' 4" length
A9006-16-X	16' 4" length
